List of Tables

Table 2.1. Main glucose transporters, tissue distribution and type of transport. 42
Table 2.2. Summary of polyphenols with antidiabetic activity 74
Table 3.1. Spot appearance, Rf, colour after revelation and presence in the aqueous extract and subsequent fractions: Hex:AcOEt 50% and AcOEt 100%. 95
Table 3.2. Compound CT-1, $^1$H and $^{13}$C NMR data (400 MHz, $\delta$ ppm, ($J$ Hz, CD$_3$OD) 98
Table 3.3. Compound CT-2, $^1$H and $^{13}$C NMR data (400 MHz, $\delta$ ppm, ($J$ Hz, CD$_3$OD) 101
Table 3.4. Compound CT-3, $^1$H and $^{13}$C NMR data (400 MHz, $\delta$ ppm, ($J$ Hz, DMSO-d6) 103
Table 3.5. Peak assignment, retention time (Rt), UV and mass spectral data of compounds detected in *C. tinctoria* flowering tops aqueous extract and AcOEt fraction. 107
Table 3.6. Precision determination: Method repeatability. 118
Table 3.7. Precision determination: Inter-day precision. 118
Table 3.8. Accuracy determination. 118
Table 3.9. Marein content in aqueous extract and AcOEt fraction using method 1. 119
Table 3.10. Standard curves equations. 121
Table 3.11. Quantification of the four chosen metabolites present in several *C. tinctoria* flowering tops extracts and fractions using method 2. 121
Table 3.12. Marein quantification present in several *C. tinctoria* flowering tops extracts and fractions. Comparison between samples and quantification methods. 121
Table 8.1. Sample usage in bioassays and HPLC-DAD-MS/MS 184
Table 8.2. Borate buffer recipe for 2 Liter solution 194
Table A.1. Antioxidant capacity of *C. tinctoria* aqueous extract and AcOEt fraction 233
